

DOE O 210.1

"Performance Indicators and Analysis of Operations"

Performance Based Contracts: Order Review Panel Decision On Team Report Recommendations

The Panel has reviewed the subject report and has disposed of the recommendation contained therein as follows.

We concur in the team report recommendation, Option 2, which is to cancel the Order. Additionally, you are to establish a working group to evaluate DOE Order 231.1, DOE Order 232.1A and its associated manual, and any reporting requirements under DOE Order 210.1 that should be retained. You should determine what existing contractor reporting requirements already satisfy contract requirements, determine what available information must be sent to headquarters, and identify any additional headquarters reporting needs. Your goal is to streamline reporting, eliminate redundancy, and create one reporting Order within 120 days.
